

[livingLAB](#) is a Detroit based studio focused on sustainable planning, community driven design and project realization. Our core business of parks and recreation planning and design, non-motorized transportation, streetscape and urban design are all underpinned with sustainable practices. Stakeholder engagement and public outreach are a part of every* project we do because we truly believe it is the crux of great design and community development. We are also committed to toeing the triple bottom line: we place equal value on being *profitable*, being *socially responsible* and giving back to our community, and implementing *sustainable* environmental practices. Our location in Midtown Detroit's Green Garage will immerse you in the social scene of the City, connect you with other entrepreneurs that are committed to a more sustainable future, and quite simply, you'll work in a really beautiful and inspiring space. We work a fairly flexible schedule allowing for a good work/life balance. Come join us and become part of a great team. *okay, maybe 90%!

The Job

We are looking for a mid-level Landscape Architect to join our collaborative team in Detroit, MI. At this Project Manager level, you will be responsible for managing and producing a full range of projects from urban design and master planning through to the delivery of construction phase documents and construction observation and administration services – mostly on urban projects, often right here in the City of Detroit.

Your Responsibilities

- Manage landscape architecture projects.
- Develop, modify and review drawings for landscape architecture projects.
- Demonstrate your creative thinking abilities and contribute to design collaboration and problem solving.
- Demonstrate your understanding of the relationship between design and constructability.
- Incorporate Sustainable Design solutions into all projects.
- Ensure livingLAB document standards are met.
- Take time to understand company agreements, contracts and deliverables and ensure livingLAB standards for project management are met.
- Actively promote collaborative thinking.
- Foster a commitment to our clients and their communities based in our triple-bottom-line culture.

The Details

- You must be proficient in AutoCAD and have 5+ years of experience developing construction documentation packages.
- Confident in developing technical specifications.
- MS Office, including Word, Excel and Outlook should be second nature.
- Are you a guru at Photoshop, Illustrator, SketchUp, GIS, and InDesign? Let's talk!
- Do you have the ability to develop photo-realistic renderings? Wow, color us impressed.
- You must have strong communication skills - verbally, graphically, and in writing. Critically important.
- Do others refer to you as "a people person"? Have a good sense of humor and not take yourself too seriously? Love it!
- Being organized, reliable and having the ability and mindset to work hard and meet quick deadlines is critical. If this isn't your thing, we might not be your best choice.

Required Experience

- Bachelor's degree or higher in landscape architecture, plus 5 to 7 years' experience; or equivalent in appropriate education and experience required. Registration with current license desired.
- Experience working with the public; comfort and confidence speaking to large groups of diverse individuals.
